06 NARRATIVE DESIGN & CHARACTERS

Story structure · 3 playable protagonists · NPC roster · World C

STORY IN SHORT

Minhmau, Tidalsika, and Linhcom (Global HMH) orchestrate a fake American military invasion of Hanoi — B-52s, F-22s, Apaches, Black Hawks — to mythologise Tidalsika as a living goddess. After she liberates the city street by street and Minhmau fakes his death on live broadcast (Notte Center Observation Deck), the trio escapes to Sharp Sail Island. They explore the island, get engaged, hold a private wedding, tour the Vuthanic, dive 26,363 m, and unlock new superpowers. Level 21: Minhmau reveals World C — infinite fractal realities — by firing the Vortex Gun. Castle fractures. Mountain shifts. Trio floats in zero gravity. Final line: "The end never ends…"

MINHMAU

The Architect · Supervillain · God Mode

- Lightning Strike / Taser / Teleport / Flight / Boom Strike / Supernova Fire Thunder
- Creator of Vortex Gun and Vortexism philosophy
- Self-declared King of Goddesses — proposes with 6-ct golden diamond rings
- Plays with lightning sparks in idle · Carbonara for breakfast · Private wedding

TIDALSIKA

Primary Protagonist · Bulletproof Fighter

- Bulletproof — bullets ricochet with metallic sparks · Full weapon arsenal
- Fights Hanoi street by street: Giang Vo, Ngoc Khanh, Kim Ma
- Shoots Minhmau on live television — completes the myth
- Empties every weapon into Minhmau at Vucrown Castle — desperate for truth

LINHCOM

Third Member · Philosophical Anchor

- Quietly identifies the plan's engine: "people follow mythology, not truth"
- Receives full superpower set + weapons at end of Chapter 2
- In the final scene: tells Minhmau to explain World C before he planned to
- Can't explain how she knew — neither can he

WORLD C — FRACTAL REALITY

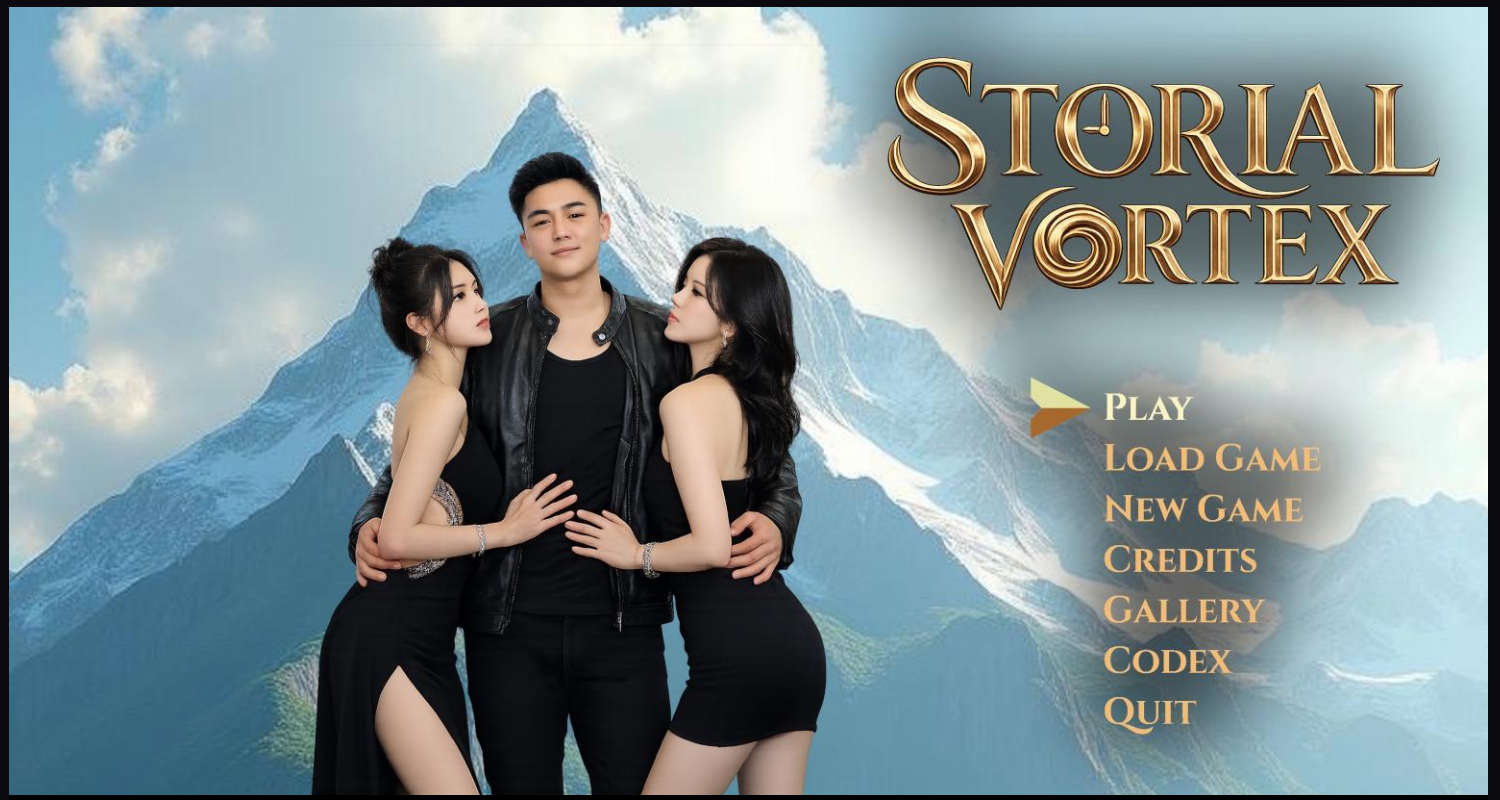

When Hanoi (World A) + Sharp Sail Island (World B) merge via the Vortex Gun (1+1=1 per Vortexism), World B is erased and the gun now points at all possible realities simultaneously — World C. Entire map geometry shifts to endlessly transforming fractals with dynamic collisions. Trio floats in 0G. After 2 minutes, fire again to return to a random normal-map location. First fractal open-world gameplay mode in video game history.

NPC ROSTER

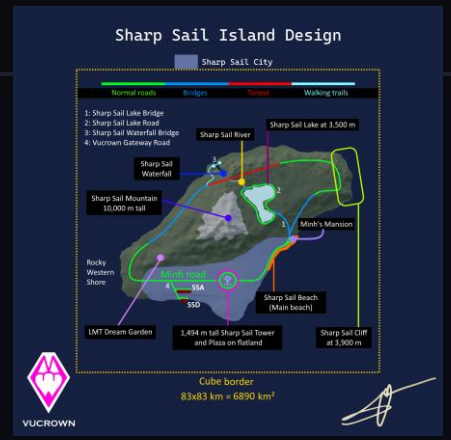

Citizens: Giang, Thu, An, Nam · Police: Lang
American soldiers: John, Thomas, Jack, Jim, Max, Henry
Goddess NPCs: Cybersika, Harthysa, Nalxandra, Inpenella, Lunaxolla, Visionsika
Animals: Soohger (Bengal tiger) · Shampark (24m Megalodon)
All in Vucrown Museum on Sharp Sail Island
